THIRD GREAT PYRAMID
IS FOUND IN MEXICO

MEXICO CITY, Saturday, January 3.

—Discovery at Teotihuacan of a third pyramid greater than those to the sun and moon, which have long puzzled archeologists and rivaling those of Egypt, is announced here. Experts who have been investigating ruins of forgotten civilizations near this city believe that in the new pyramid may be found relics which will be invaluable in the study of the age of the Toltecs.

Archeologists have for many decades been interested in the two great pyramids located at Teotihuacan, a town twenty-seven miles northeast of Mexico City, the name of which means "city of the gods," in the Aztec tongue. The origin of these pyramids is unknown, and confused legends and traditions relative to them throw little light on their history. They were, however, used as burial places, and in many ways resemble the pyramids of Egypt.

Everett Colby, former New Jersey state senator, a member of the Shipping Board and Emergency Fleet Corpora-tion during the crucial days of ship construction and later major in the tank corps, and now a candidate for United States senator, has been appointed by Will H. It's the best thing the organization has done in years. "When the republican leaders in Congress appear more interested in an investigation of the President's wash bill while in Paris than in the most important problem the world has ever faced it is high time either to change lead-ers or serve notice upon them that they were sent to Washington to carry out a definite party policy and not to vent their spleen upon individuals, however much they may be in disagreement with the President or anybody else."
